

D.M. GRAY BEST STUDENT PAPER IN HYDROLOGY CONTRIBUTORS

To be eligible for the award, student applicants must be registered as members of the Canadian Geophysical Union at the time of the Annual Meeting. You can register at: <http://www.cgu-ugc.ca>

Manuscripts

One manuscript should be submitted to Dr. Daniel Peters (Daniel.Peters@ec.gc.ca) by the due date indicated in the call for papers. Only original papers will be accepted. All papers should be submitted in English. The manuscript should not exceed five (5) pages including text, figures, tables and references. The paper should be submitted by e-mail in MS-Word or Adobe PDF format. Finalists will be selected on the basis of the five-page papers. Co-authorship is allowed but the student must be the first author and presenter. The criteria for assessment include originality, significance of the results, and quality of presentation. The D.M. Gray medal, along with a \$1000 prize, will be awarded at the CGU Banquet/Luncheon.

Text

Manuscripts should be single spaced, using 12 point font, with wide (1 inch) margins, on one side of the paper only. Footnotes must not be used. Authors should write concisely. Authors' names and page numbers should be written on all sheets of the manuscript.

Title

The title should be brief, and the author's name should be typed on the line below the title; the affiliation and address should follow on the next line. In the case of co-authors, respective addresses should be clearly indicated. Correspondence will be sent to the first-named author, unless otherwise indicated.

Abstract

The body of the manuscript should be preceded by an abstract, which should summarize the entire paper, not the conclusions alone. It should be intelligible in itself without reference to the paper.

Illustrations, Figures and Tables

These must be within the five-page limit of the manuscript.

References

All references should be arranged in alphabetical order and grouped together at the end of the paper. The form of reference should be as follows: Ferguson, R.I. 1985. 'Runoff from glacierized mountains: a model for annual variation and its forecasting', *Wat. Resour. Res.* 21, 702-708.

Abbreviated names of journals if used should be given in the *World List of Scientific Periodicals*, 4th edition, London 1963-4. Book references should be given as follows:

Hillel, D. 1980. *Applications of Soil Physics*, Academic Press, New York, p. 385.

In the text, references should be cited by the author's name and the year in parentheses (Smith, 1970). Where there are two or more references to one author in the same year, the following form should be used: (Smith, 1965a) or (Smith, 1976b). Where references include three or more authors the form (Smith et al., 1966) should be used.
